

Testimonials from drawing sector

“My company is getting benefits financially by joining METABUILD project. This is happening because the engineers of METABUILD project have identified different simple options to reduce costs. All the engineers of METABUILD were very cordial during their work. This kind of project should take place on a regular basis.”

Md. Mozammel Haque
Proprietor, Popy Cables Industry

“I am very much grateful to the METABUILD project. After joining this project I tried to make my factory efficient in terms of resource and energy consumption. METABUILD project was really supportive for us as we are small entrepreneurs. I pray for the team members and for successful completion of the project.”

Md Nurul Haque
Proprietor, Marjia Cables

Testimonials from fabrication sector

“The activities of METABUILD project were satisfying for me. Because by following their suggestions, I’ve reduced my electricity consumption and electric bill. I became aware about the necessity of maintaining cleanliness in workplaces. The overall production system of my factory is now better than before by following their suggestions.”

Md. Abdul Aziz
Proprietor, Rolex Metal

“In all respects, the METABUILD project has utmost importance for our country's development. I found the following points of this project very effective. (1) The engineers had keen knowledge on every aspect of the industry. (2) They pointed out simple but very effective solutions for saving resources. (3) They have regular connection with us and they visit us at regular intervals. (4) They suggested solutions within our reach. So no big changes or costly modification was needed.”

Shahed Hassan
Managing Director, Artisan Craft BD Ltd

“We have benefitted from METABUILD project in terms of materials and power consumption. As per suggestions received from METABUILD team, we have used various steps which gave us chance to use daylight more than before. The initiatives they have proposed will certainly benefit the industries in Bangladesh.”

Kawsar Alam
Manager, Steel Mark Building Solutions Ltd

“Our company has got economic and environmental benefits through implementing the appropriate and effective suggestions provided by METABUILD team. We already saved a good amount of money in terms of electricity and gas savings and also were able to improve indoor environment through reduction of indoor air pollution. We believe that other improvement opportunities will also be induced if this project continues. I like to thank METABUILD project and all the team members for their holistic and effective support for our industry as well as their contribution for our country.”

Md. Faruque Hossain
Manager, Apollo Power Electric and Electronic

Testimonials from foundry sector

“METABUILD has been a very unique project. With the support and discussion from the METABUILD team, we managed to learn different technical aspects. We have successfully installed energy saving light-emitting diode (LED) bulbs instead of Compact Fluorescent Lamps (CFLs) and insulated all the broken lines on the furnace walls to reduce heat loss. As per the recommendations, we have also been following machine maintenance in more energy efficient ways. Moreover, we have taken initiative to introduce electric furnace in our facility for better energy efficiency with better productivity.”

Md. Iqbal Hosen
Proprietor, Titas Moulding & Works

Testimonials from metal finishing sector

“METABUILD project helped us to change our mind-set. They helped us to improve our process efficiency with very low cost implementation suggestions; in some cases without any cost. It will be highly appreciated if this kind of project takes place in the future.”

Md. A Sattar Miah
Proprietor, Best One Metal

“At first I would like to thank METABUILD project especially all the team members who worked with us, trained my workers and provided a lot of support. I came to know about the energy and resource efficiency after joining the METABUILD project. Through this project I am really aware about the importance of resource management, which helps me a lot in terms of energy saving and hopefully in future this saving will be increasing exponentially. It will be very helpful for us if the project continues if possible.”

Mustafa Kamal Kiron
Proprietor, H.R. Metal Industries

“I have been in the METABUILD project for the last few years. According to their suggestions, I have changed all of my factory lights into light-emitting diode (LED) lights and insulated my heating coils, thus reducing electricity consumption.”

Md. Mohiuddin
Proprietor, Noor Enterprise

“I would like to thank the technical consultants of METABUILD project. I know them for the last couple of years. They gave us technical knowledge about reducing power consumption, productive use of gas and useful suggestion of using light-emitting diode (LED) bulbs and reducing compressor leakages. Their advice was really helpful for us. I wish the project successful completion and good luck to them.”

Mr. Faqrul Islam Sujon
Proprietor, Fantech Metal and Engineering Works

“Suggestions from the METABUILD project team were easy to learn and implement. Thanks to METABUILD for providing their support to the aluminium companies in Chittagong. The training on Resource and Energy Savings was very useful for us. As the President of Chittagong Aluminium Samitee, I would like to express my gratitude to the METABUILD project.”

Md. Harunur Rashid
Proprietor, SS Aluminum
President, Chattogram Aluminum Shilpo Malik Samitee

Testimonials from electric switch sector

“I received best support from METABUILD team. They showed me the ways of improving my factory within my capacity. Their reports were very useful for monitoring the energy savings.”

Md. Mominur Rahman Mithu
Proprietor, Shark Electric

“METABUILD project has brought drastic changes in our bakelite sector. We are very grateful for the support we are receiving from METABUILD. I have saved good amount of money by implementing simple options. METABUILD has made me realize the importance of monitoring usage of electricity and other resources.”

Nasir Uddin Sarker
Proprietor, Nasir Electric and Nasir Engineering Workshop

“I started my business in 2013. Among all the experiences, joining METABUILD project is one of the best. From METABUILD I have learned how to reduce production cost by reducing resources and energy consumption. I believe this will enhance my market as well. I wish glorious success to METABUILD.”

Md. Roman
Proprietor, KSRM Electric Product

“After joining with METABUILD project, I have started following their advice. What I actually saw with their recommended options was the huge possibility of saving electricity (I already replaced all the lights by light-emitting diode or LED lights). I am happy with their service.”

Md Liton Miah
Proprietor, LT Electric Product

“The METABUILD team made us aware about electricity saving by putting insulation on pressing machine, how to optimize raw material consumption and the necessity of cleanliness in our factory workplace. Their suggestions were good and helpful for us.”

Md. Wali Ullah
Proprietor, Life Electric Product

“My company has reduced electricity consumption and waste production by participating in METABUILD project. In future, I hope there will be more improved and organized training through similar projects. I am also expecting the option of financial grants in the future projects.”
