

Improved working conditions – better illumination

Location: Pioneer Electrocables, Nepal

Process: Electrical cable manufacturing

Before

- Lights were placed high in the ceiling so there was lower illumination in the working area

After

- Height of some lights was reduced by simply suspending these from chains - halving the height increases illumination by 4 times
- This motivated lowering the remaining lights to provide better workplace illumination

Costs/benefits

Cost: Nil

Payback: Immediate

Annual savings: Better working conditions
Increase in productivity
